

Our goal, as outlined in our Shared Vision:

We see a school district where we benefit from facilities that are updated, well maintained and inviting, and include cutting edge technology and equipment.

What decisions do we need to make to request a bond issue?

- How much money do we want to ask the community for and should it be a single or multiple question request?
- When do we want to accomplish this?
- What projects do we want to complete with these funds?

Key subquestions to address to come to an ultimate conclusion for which projects will we complete:

- Which facilities will we complete projects for?
- Will we need all of our facilities into the future based on enrollment trends and, if not, that will we do with them if renovated?
- Do the projects meet future instructional needs and trends?
- Do the projects meet the highest priority items and, if not, is there justification?
- Have we considered “wow” factor items? (as the look of our facilities will be in place for some time)
- How many projects can we complete?
