ACAT - Alternative  
Classrooms for the

Academically  
Talented

Lora Boka, Principal  
David Zyczynski, ACAT Facilitator  
Christin Aljets, ACAT Tester

## Selection process

Parents or teachers of current kindergarten through grade four youngsters may nominate their students from November through February. Notification occurs in Livonia Public Schools *Dialog*, on its website, as well as emails from school principals.

Students take standardized achievement and ability tests. We also use qualitative data for selection, including parent and teacher recommendations. There is no cost for the testing. Please refer to our website for more information about selection criteria.

Selected students are invited to visit Webster in the spring to see their new school. Youngsters attend Webster the following September.

## Curriculum and Delivery System – The Integrative Education Model

Students, grades K-4, who meet our selection criteria, can become full time students in the ACAT program (Grades 1-6.) The program's home is at Webster Elementary, which also houses a center program for students with cognitive and autistic impairments.

ACAT is supported by a principal and the ACAT Teacher Facilitator and additional support staff.

Students learn in multiage classrooms, called "families." This is the method of choice and provides teachers to possibly have students for more than one year and to place students in flexible groups. The alternative classroom structure provides a nurturing environment, a differentiated curriculum and the opportunity for

essential interaction among children with like abilities, interests and talents.

The delivery system is based on the research and work of Dr. Barbara Clark and is called the Integrative Education Model (IEM.) Clark uses current knowledge of the brain and its functioning to suggest strategies to optimize learning for children. Complex and challenging cognitive activities, choice and perceived control, movement and physical encoding, a responsive learning environment and use of empowering language are foundational to our program.

The curriculum is an outgrowth of LPS Core Curriculum but is differentiated through pacing, depth and methodology.

**For more information about our curriculum, delivery system and selection process, please visit our website. You will also find necessary forms to nominate a child for the ACAT program.**
