

Good Evening LPS Families,

As we wrap up our week here in LPS, we wanted to touch base with you on a couple of items.

As promised, we have summarized the Wayne County Health Department school guidance document, which was released by the county, in a *draft* format on Wednesday. This guidance, specifically for health screening protocol and positive COVID-19 cases protocol, will play a significant role in our Return to Learn plans for the health and safety of our students and staff.

[To review the guidance, please click here.](#)

Also, we know that several families are awaiting information about the 100% online option, Livonia Virtual, which will be offered to students in grades K-12 who are currently enrolled in Livonia Public Schools. We have included a summary below for you and will share more detailed information when the commitment form is sent out to families next week.

Throughout this week, the district has collected feedback and questions from parents and staff, following the Return to Learn plans that were presented to the Board of Education on Monday evening, July 27th. Feedback was collected from audience communications on Monday and also through email, surveys, small group staff meetings and phone calls.

The amount of feedback was amazing and we are grateful for each and every piece of input that we've received. We want to be sure to thoroughly review and answer as many questions as possible, and would like to take a couple more days to do so. Please expect to receive a comprehensive Frequently Asked Questions (FAQ) document via email on Monday, prior to the Board of Education meeting.

We appreciate your patience as we continue to develop plans for our more than 14,000 students and nearly 2,000 staff members to return to learn safely in September.

Thank you and we wish you a very nice weekend.

Andrea Oquist, Superintendent
& the LPS Cabinet Team
