Scamp 2023

Dates: June 26 - August 2
Monday-Wednesday, 9:00-2:00
No SCAMP Camp the week of July 3 - 7

SCAMP is a five-week summer program developed and designed for children and young adults with special needs. It runs from the end of June to the beginning of August (except for the week of July 4) from 9:00am-2:00pm Monday through Wednesday. The cost of SCAMP is \$500 for in district and \$700 for out of district. There is financial assistance for those in need. The actual cost of the camp is much higher than the tuition but we strive to keep costs as low as possible for our families.

SCAMPers range in age from 3 to over 40 years old. There is almost a 1:1 ratio of SCAMPers to counselors/volunteers. Physical, as well as, emotional support is provided while fostering a sense of belonging in addition to community and social engagement. The camp is more than just an exciting place for the SCAMPers; this program provides a growing and learning opportunity for both the young adults hired to be aides or volunteers for the SCAMPers, as well as a respite for the SCAMPers' families who care for them.

Needs range from autism spectrum disorders, cognitive or behavioral impairments to physical disabilities. SCAMPers make fast friends at camp and also get to see and do things in the community that might have previously been unavailable to them.

Camp Tall Tree

1005 Triangle Lake Rd, Howell, MI 48843

(734) 249-8094

<https://www.howellnaturecenter.org/camp-wonder/camp-tall-tree/>

Camp Tall Tree offers an overnight camp experience for children with Autism as well as their neurotypical siblings. This program serves campers 7-17 years old and is designed to meet a wide range of emotional, behavioral, and cognitive needs.

Camp Tall Tree offers a classic overnight summer camp experience. Our program strives to support autistic children as well as their siblings. Camp Tall Tree, believes that they should create an environment that fits our campers rather than molding our kids to suit the world. To that aim, they take the camper's perspective and requirements into account in all they plan and do.

This covers activities such as "challenge by choice," "challenge by choice," and " Visual cues and reminders, Sensory break locations, as well as access to calm rooms during any loud times of the day, Access to visual and textual communication channels with personnel, as well as a structured and regular daily routine. As a result, they expect that children in their sibling's program will come with a different viewpoint and experience at home than other children their age.
